FAQ

---

Firewire provides much more power, and is much more reliable than USB for this sort of thing.

1. [agent driver](#)

When you do a Get Info on the mounted drive volume in the Finder, what is the Format? Do you plan to use it with Windows? If not, if it's not Mac OS Extended (Journaled), you will probably want to use Disk Utility to erase it and format it as Mac OS Extended (Journaled) (HFS+). I used it for months as a Time Machine volume, thinking it was backing up everything without issue, only to find one day when I needed it most (the internal hard drive in my MacBook Pro bit the dust) that it corrupted data stored on it!! I believe this was due to USB voltage drops encountered while plugged into the USB port on my MacBook Pro.. What they don't tell you is there are cases where two isn't enough as well! Through my employer, I purchased a FreeAgent Go USB with a MacBook Pro.. Click to expand While I would agree with you re firewire being vgood, I wonder about how secure your data will be if your Mac gives up the ghost, and you have to buy a new one.. I've learned the hard way that USB can't reliably deliver the power needed by some hard drives, which can cause them to spin down at critical times, which, in turn, can easily cause data loss and corruption! There's a reason they give you a cable to plug it into \*two\* USB ports - because one USB port can't deliver the power required.

## **agent driver**

agent driver, agent driven meaning, agent driver job, agent drive, agent drivers needed, agent driven inventory discovery, agent driven, agent driven architecture, agent driven content negotiation, agent driven synonym, agent driven programming [download ableton live 9 free mac](#)

iBook G4, OS 10.4.11 I just bought this Seagate 320GB portable drive; it is NOT Mac specific, and comes with a couple apps for Windows on it.. What am I missing here? This Seagate is connected directly to my iBook with the USB cable supplied; the LaCie is connected to a 1TB Seagate FreeAgent Desk drive, which is connected to my iBook by Firewire. Buy Seagate FreeAgent Go for Mac 320 GB USB 2.0 Portable External Hard Drive ST9032003FJA101-RK (Silver): External Hard Drives - Amazon.. Backup Plus and GoFlex Desk Thunderbolt Software for Mac The Seagate Thunderbolt adaptor driver is only needed if you are using 3 TB or 4 TB drives with the Thunderbolt adaptor and plan to change drives with other GoFlex adaptors (such as USB or FireWire).. When I try to move the contents of my smaller LaCie drive to the new Seagate, I get this message: 'The item 'LACIE 40GB' could not be moved because 'FreeAgent drive' cannot be modified..' I bought the Seagate at Sam's and was assured that my Mac would see the drive and treat it as another drive and I should be go to go@well.. com ✓ FREE Thanks for your consideration I appreciate your patience and advice for an old lady.. I ended up disassembling mine and purchasing a much better Firewire enclosure to put the drive into instead. e828bfe731 [Corby 2 Landscape Mode Download For Mac](#)
